About Global Atomic

Global Atomic is a TSX Venture listed company providing a unique combination of high grade uranium development and cash flowing zinc concentrate production.

The Company’s Uranium Division includes six exploration permits in the Republic of Niger covering an area of approximately 750 km². Uranium mineralization has been identified on each of the permits, with the most significant discovery being the DASA deposit situated on the Adrar Emoies III concession, discovered in 2010 by Global Atomic geologists through grassroots field exploration.

The Company’s Base Metals Division holds a 49% interest in the Befesa Silvermet Turkey, S.L. (“BST”) joint venture which operates a processing facility located in Iskenderun, Turkey that converts Electric Arc Furnace Dust into a high-grade zinc oxide concentrate and sold to zinc smelters around the world. The Company’s joint venture partner, Befesa Zinc S.A.U. (“Befesa”), holds a 51% interest in and is the operator of BST. Befesa is a market leader in EAFD recycling, capturing approximately 45% to 50% of the European EAFD market with facilities located throughout Europe and Korea.
